STEEL TAKES LEAD IN LIVELY TRADING

Popular Shares Hold Prominent Place in Continued Strong Buying on New York Exchange.

NEW YORK, April 23.—Factors which contributed measurably to the strength and buoyancy of yesterday's stock market, notably the confident buying of rails, were operative again today, reinforced by a keen inquiry for other popular shares, particularly steel, copper and numerous equities.

United States Steel was the central feature, asserting its former leadership on an enormous turnover at an extreme gain of 2 3/4 points to 197 1/2, though yielding all but a large fraction in the extensive profit taking of the last hour.

The rise in rails was again restricted mainly to low-grade issues of the western and southern sections, investment shares such as transcontinentals, Reading and eastern trunk lines at no time making more than slight gains.

Aside from Royal Dutch, which was again in the lead with shipping and motor and their accessories, but metals were, unusually active and strong. International Nickel being the only noteworthy exception.

Tobacco, fertilizer, food specialties and a variety of miscellaneous issues forfeited much of their valuable gains at slight pressure, an irregular tone prevailing at the active close.

United States registered a 4 1/2 per cent gain on sales.
